CALDERDALE COUNCIL

INVENTORY HELPS CALDERDALE COUNCIL MODERNISE THEIR ELECTION SIGN IN PROCESS AND REMAIN GDPR COMPLIANT

A unique way in which the InVentry system has been put in place is proving a success. For Calderdale council the InVentry system is used to efficiently get candidates, agents and guests into the count venue on the day of an election. Before adopting this method of visitor management, a much less time friendly approach was taken to do so. Ian Gledhill explains:

"People used to have to sign in, they were given a badge manually and a wristband. But now, everyone comes in, scans their barcode and the badge gets printed and they're in and away. It's 3 or 4 times faster than it used to be."

The outdated approach was not only proving time consuming but above all else insecure. With InVentry in place the risk of unwanted visitors is minimized and can be dealt with effectively. Ian explains:

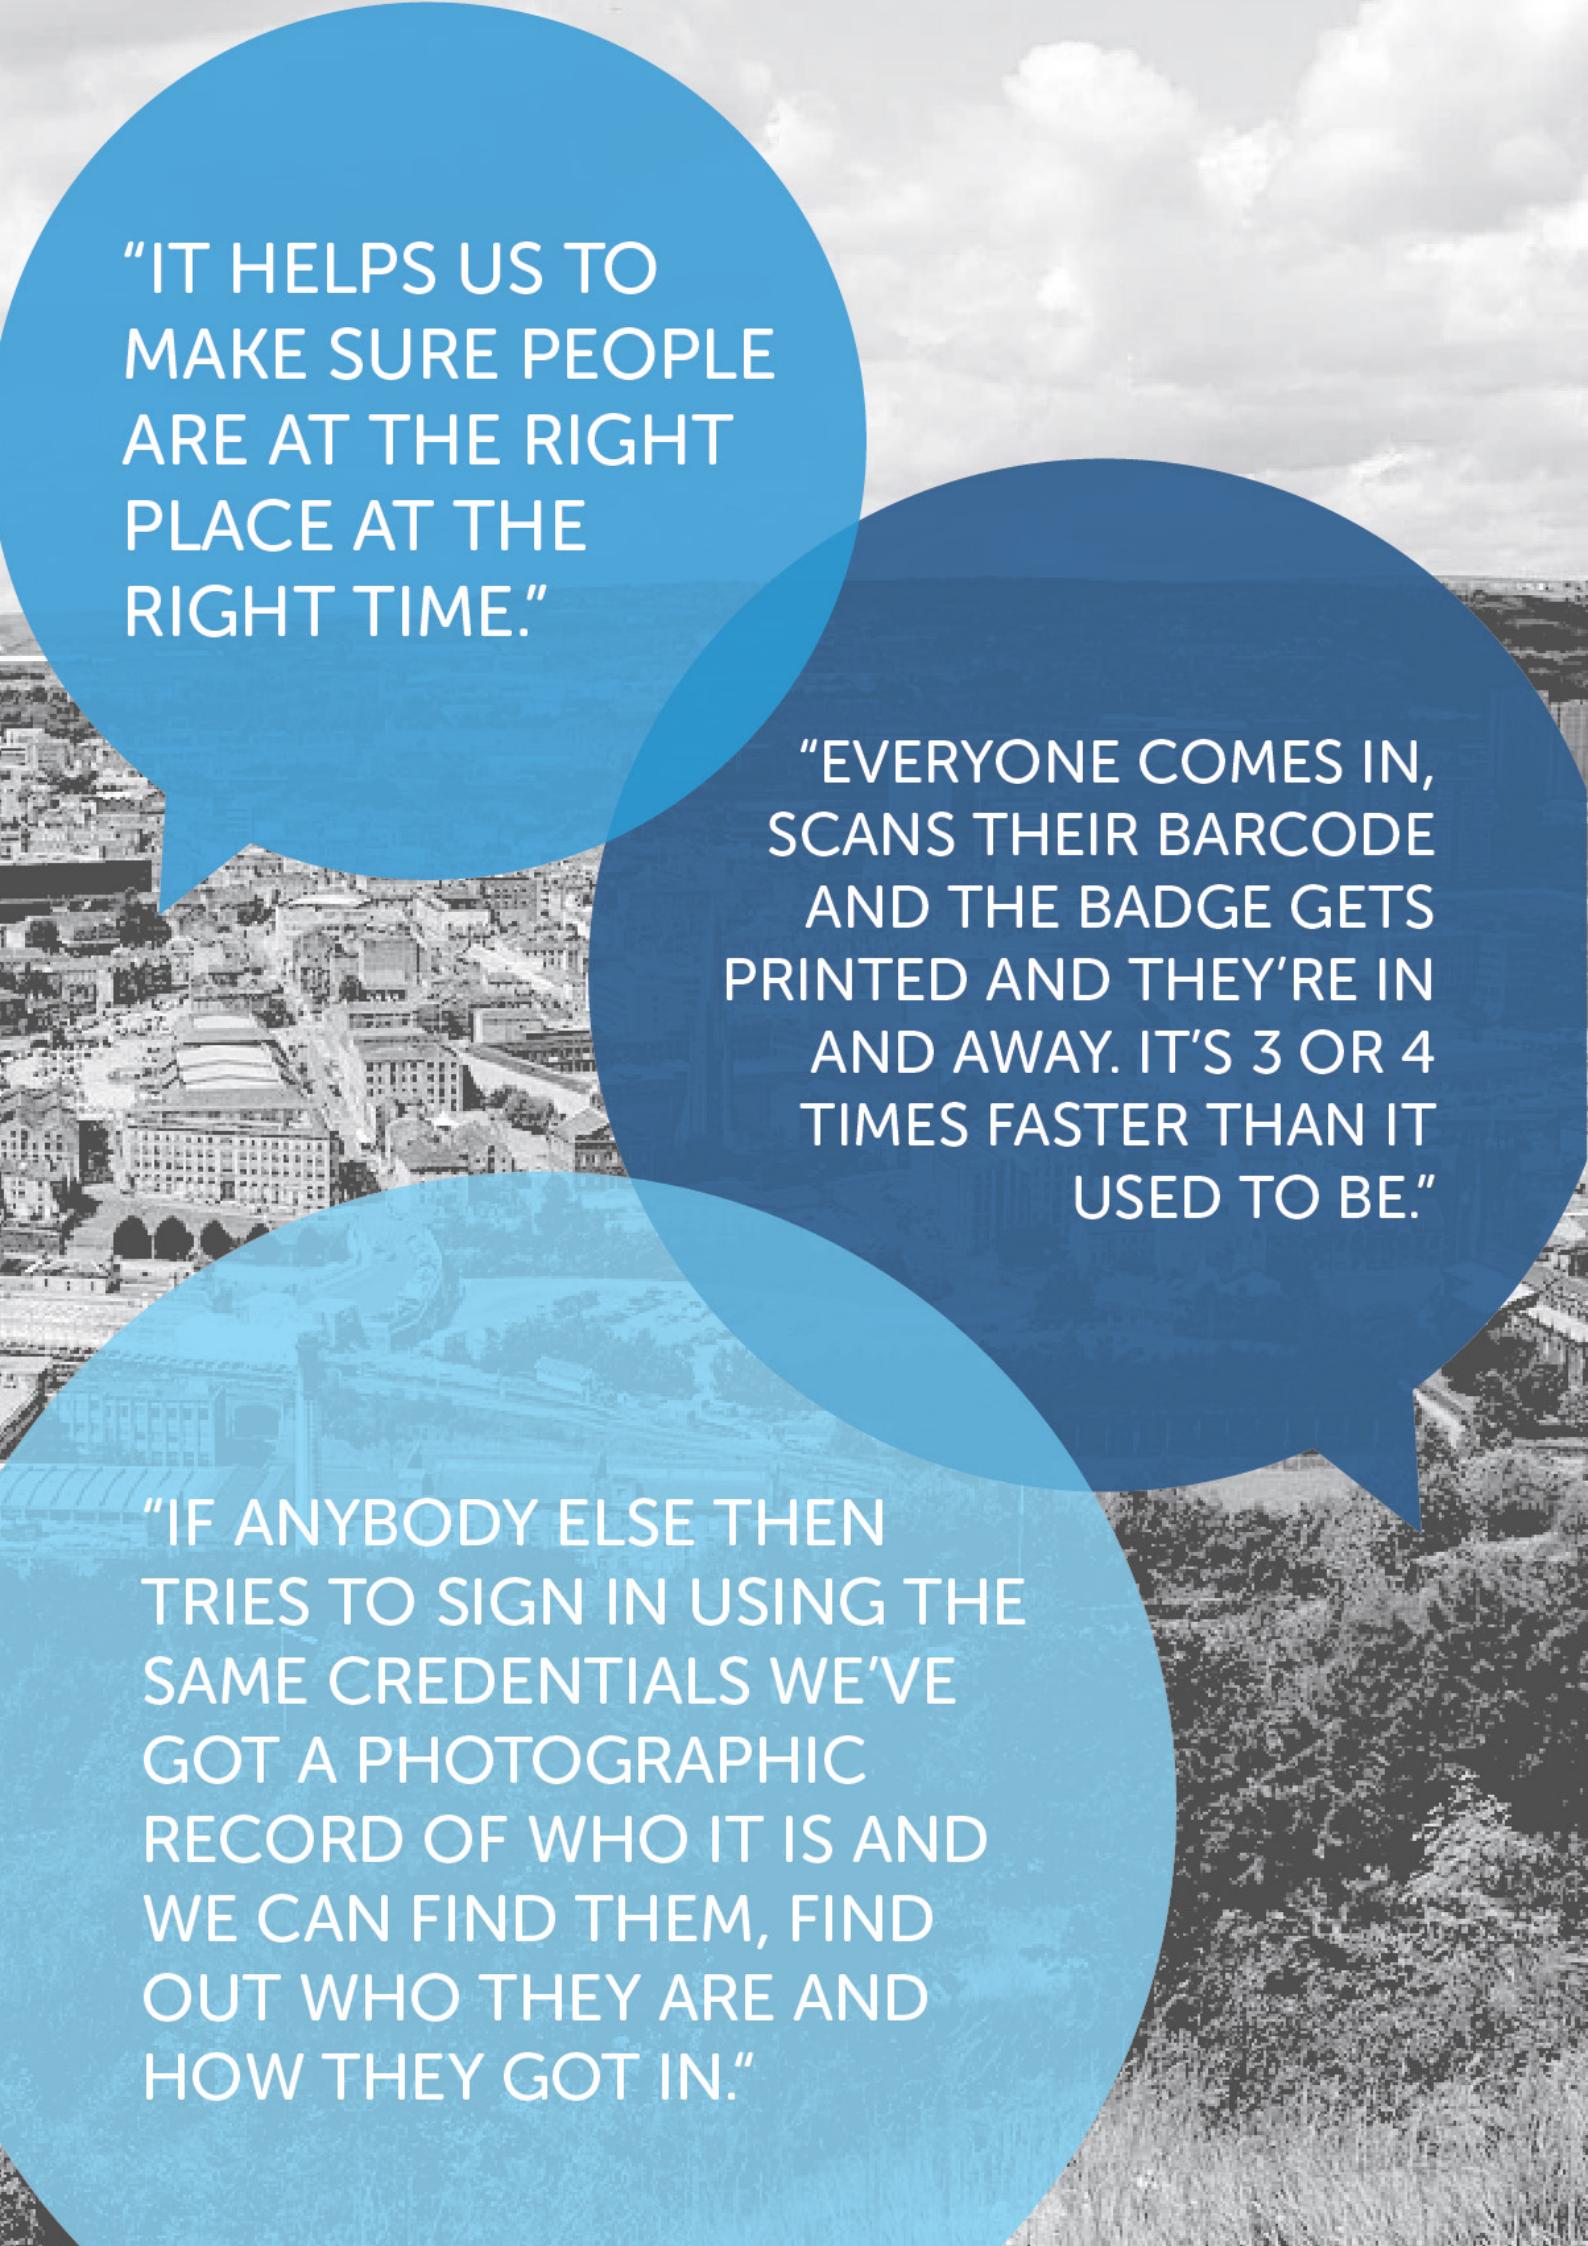

"Well, essentially, we already know who is invited so anyone that is not on the list is not coming in. We just use it to record that people are there. If anybody else then tries to sign in using the same credentials we've got a photographic record of who it is and we can find them, find out who they are and how they got in."

Knowing that the data can be disposed of is something which Ian feels positive about with GDPR being such a concern. We asked him if he was confident with the service that the product provided:

"From a GDPR point of view, yes. I filled out one of our checklists and you've got a section on your website as well. I'm happy with the way that it's going, completely happy."

To anyone who is considering using InVentry, Ian would happily recommend the system. He says:

"From the point of view of actually using the system to get people in and accounted for - it saves time and it's just infinitely better than the system that we used previously. It also helps us to make sure people are at the right place at the right time which is brilliant!"

"IT HELPS US TO
MAKE SURE PEOPLE
ARE AT THE RIGHT
PLACE AT THE
RIGHT TIME."

"EVERYONE COMES IN,
SCANS THEIR BARCODE
AND THE BADGE GETS
PRINTED AND THEY'RE IN
AND AWAY. IT'S 3 OR 4
TIMES FASTER THAN IT
USED TO BE."

"IF ANYBODY ELSE THEN
TRIES TO SIGN IN USING THE
SAME CREDENTIALS WE'VE
GOT A PHOTOGRAPHIC
RECORD OF WHO IT IS AND
WE CAN FIND THEM, FIND
OUT WHO THEY ARE AND
HOW THEY GOT IN."
